

Tamanu oil is produced by the Tamanu tree. The tree bears fruit (which are actually nuts) which yield oil. The oil is naturally extracted from the nuts and never compromised with artificial chemicals, additives or preservatives keeping it 100% pure.

The Tamanu tree is found in Vanuatu, an island in the Southwest Pacific.

Each nut kernel is hand-cracked, sun-dried and then cold pressed without heat or chemicals to extract the oil resulting in the finest, pure, rich, dark green luxurious Tamanu oil

Tamanu oil has the **ultimate skin cell rejuvenation properties** hence is used by local healers and actually now world wide to promote the formation of new tissue, thereby accelerating wound healing and the growth of healthy skin. Aging is the slow down of skin cell production.....now we can speed it up again.

It is applied liberally to cuts, scrapes, burns, insect bites and stings, abrasions, acne and acne scars, psoriasis, diabetic sores, anal fissures, sunburn, dry or scaly skin, blisters, eczema, herpes sores, athletes foot, and the reduction of foot and body odor (makes for a fantastic, natural underarm deodorant). It has also been massaged into the skin for the relief of neuralgia, rheumatism, sciatica and even baby diaper rash.

Main Benefits of Tamanu Oil

- anti-inflammatory
- antibacterial
- assists in formation of new tissue

- a natural underarm deodorant
- removal or reduction of unsightly age spots (another anomaly)
- relieve symptoms of gout
- effectively treats athletes foot
- ring worm
- fast pain relief from neuralgia, sciatica, shingles, rheumatism

Tamanu oil contains three basic classes of lipids: neutral lipids, glucolipids, and phospholipids. The main biological functions of lipids include energy storage, as structural components of cell membranes, and as important signaling molecules. The oil also contains a unique fatty acid called calophyllic acid, and a novel antibiotic lactone and non-steroidal anti-inflammatory agent called calophyllolide. These and other components, including anti-inflammatory coumarins, account for some of the oil's beneficial properties. Research has clearly shown the antibacterial and anti-inflammatory property abilities. Case studies prove the unique scar reduction ability of Tamanu oil though it's not yet explained in scientific literature. The same is true for Tamanu's anti-neuralgic (nerve pain) properties; it's relief of neuritis is also well documented, but the constituents responsible and their modes of activity are not yet known.

In addition, you may find that a Tamanu Oil based cream to be a very suitable application for your pet. Given that the benefits of this fabulous oil seem to be endless, it shouldn't come as any surprise that its amazing cell rejuvenation properties work on animals such as dogs, cats and even horses. Humans and animals are not all that different. Animals can also suffer from conditions akin to Rheumatism, post surgical wounds, scarring, a pulled muscle, a sprain or general inflammation. Fleas and bites commonly lead to itching and sores. All of the natural healing properties of this oil make it an ideal natural remedy for these conditions.
